

Aspire

Aspire has all the functionality, intuitive interface and ease of use of Vectric's VCarve software. In addition it adds the tools to turn 2D data (vectors and images) into decorative 3D reliefs and then machine the result. This allows you to create finished parts that range from simple shapes to amazing custom decorative relief carvings. Jobs can be created from scratch using Aspire's design and modeling capability or can be made using imported data. Aspire allows you to import an unlimited number of 3D models from other design programs and edit and combine them to make custom parts with your CNC.

Aspire retails for **£1,295/€1,800** but is also available as a full value upgrade for VCarve so you only pay the difference in their retail prices. This provides an easy to learn and affordable way for VCarve users to add 3D modeling capability to their operation when it's convenient to do so. Download the trial version to experience for yourself the power and simplicity of Aspire's comprehensive tool-set.

- 3D Component Design from 2D vectors
- 3D Textures from images
- Interactive 3D editing - sculpting, blending & smoothing
- Import multiple 3D files (STL, OBJ, 3DM, SKP, DXF) for assembly and editing
- The same comprehensive set of 2D Drawing tools and 2D & 2.5D and 3D toolpath options as VCarve
- Project 2D & 2.5D toolpaths onto 3D shapes
- The same detailed multi-color toolpath preview as VCarve to see what you going to cut before you machine
- 1000+ 3D clip art files including over \$3000 worth of Vector Art 3D Models
- 35+ hours of high quality Video Tutorials
- 300+ page searchable electronic Reference Manual
