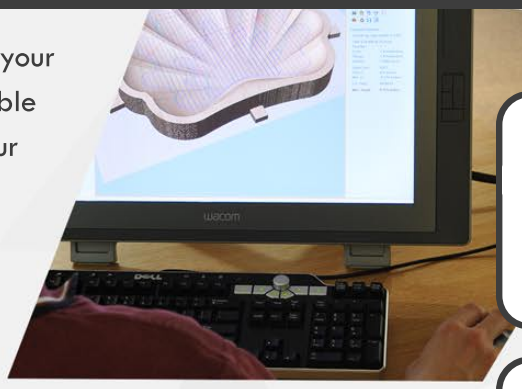
Vectric
PASSIONATE ABOUT CNC

Power | Simplicity | Results

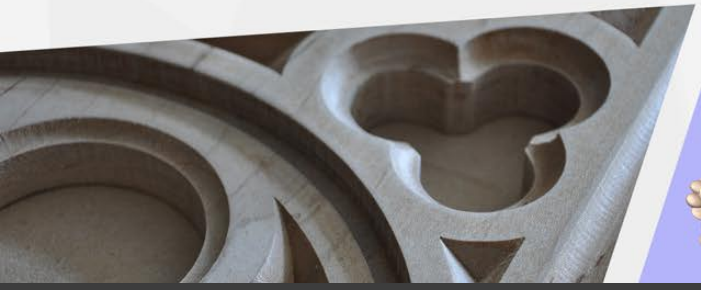
"No matter which CNC machine you own you can't beat Vectric software, their customer support and their innovative approach to making CNC machines accessible to the masses." - Keith Outten, Sawmill Creek Forum

Vectric software makes cutting parts on your CNC a rewarding and enjoyable experience. Our focus on making our programs as simple to use as possible, combined with class leading functionality allows you get the job done quickly and accurately.



Our customers use Vectric software for a vast range of applications, including cabinet making, wood working, sign making, theatre and movie props, plastic fabrication, hobby crafts and many others. Understanding what our customers want to make ensures that we provide software that has all the key features they require.

We think the best way to prove how good our products are is to let you try them and decide for yourself, so we offer FREE downloads of our Trial Software, Training Videos and Sample Files. You can also access our vibrant User Forum and discover all the benefits of joining the Vectric Community by visiting our website.



The Vectric Difference

Purchasing our software is not the end of the journey with Vectric but the start of what we hope will be a long and fruitful relationship.

Convenience

All new software purchases include 12 months of free upgrades and include a license issued exclusively to an individual that lets the same user install the software on up to 3 computers.

Support

Through our dedicated support website we offer extensive free video tutorials, free project files and many other resources to help new users get started and experienced users continue to get the most from their CNC investment.

Future

If you wish to move up to a higher level Vectric product we discount the full purchase price of your original software from the cost of the upgrade. These discounts apply for Vectric software bought directly as well as that which comes bundled with a CNC machine.

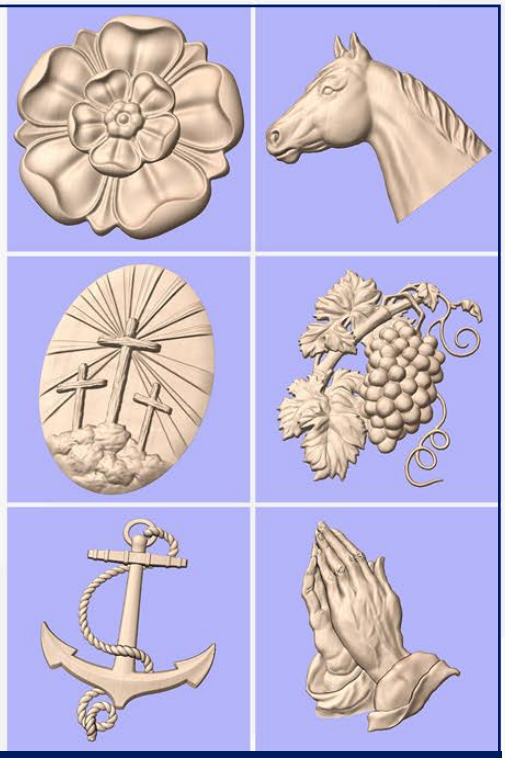
VectorArt 3D



At VectorArt3D.com we offer a library of over 1500 high-quality, CNC-ready dimensional clip art models.

These can be purchased, downloaded and carved as individual models or combined in VCarve or Aspire to make more complex designs.

www.vectorart3d.com

DESIGN & MAKE

Design & Make takes the CNC-ready clip art concept to the next level. Each project includes 5 or 6 themed models along with suggested layouts. Using VCarve or Aspire these can be assembled to make many different designs, which you can then customize further with text or other embellishments. Design and Make provide a simple solution to creating a custom 3D project.
